Autodesk Architectural Desktop and Autodesk Architectural Desktop Mobile are available for Windows, macOS, Android, and iOS devices. In March 2019, Autodesk released AutoCAD 360, a web-based design and collaboration platform that runs on the Web, iOS, macOS, and Android. Command line AutoCAD LT is available as a command line tool, or batch script, and requires Windows. It is used for drawing, manipulating, and exporting drawings. Previous versions of AutoCAD allowed users to write programs that performed similar tasks in-line, or as a macro. For example, the R13 and later versions of AutoCAD included a command line macro language called The Language of Macro's (TOLM). (XMLSTAR is a newer command line macro language for AutoCAD LT). AutoCAD LT and AutoCAD LT 2016 can export and import DXF, GIS-compatible formats (GeoPackage, GPKG, and GEOS), Raster format (RAS and RAS2), NFS, and DXF+. The drawing information can be sent to a file, a Web site, or an FTP site. Drawing information can also be sent by email to collaborators.
